6+4=? (How Intellegent are you)?

acton = brain

👁 89 ✓ 20 ⭐ 5

Chapter 1 by Nini Reyes

Can you figure this out?

6+4= 210

9+2= 711

8+5= 313

5+2= 37

7+6= 113

9+8= 117

10+6= 416

15+3= 1218

Chapter 2 by Magdalene

6-4=2

6+4=10

Therefore, 210

9-2=7

9+2=11

Therefore, 711

and so on

John has some chickens that have been laying him gold coins. He wants to show his friends, so he goes to several of his friends and asks them for a number of coins. He finds out that he needs to give each friend 10 extra coins. See more of Story Wars

What is the least number of eggs he needs for this to be true?

Chapter 3 by Toño

301 eggs

$301/7=43$ eggs

$301/6=50$ remainder 1

$301/5=60$ remainder one

and so on, so forth.....

Replace the question mark with the correct number

$9090 = 4$

$1234 = 0$

$6055 = 2$

$9081 = 4$

$8888 = ?$

Chapter 4 by Αηγιε Λειγη (GONE...)

$8888 = 8$

because there are 8 circles in the number 8888.

Just like there are 4 circles in 9090, none in 1234 and 2 in 6055.

Now.

Find Next Number in the Series

2 9 3 1 8 4 3 6 5 ?

Chapter 5 by Toño

2

8 6 5 3 2 2 1 0 4 2 4 5 7 2

Do you get it now?

The first series of numbers is 2, 3, 4, 5, and so on.

The second series is 9, 18, 36, 72, and so forth.

When is 99 greater than 100?

Chapter 6 by thelastunicorn

A microwave.

If you use a microwave, and put in "99", the microwave will run for one minute and thirty-nine seconds. However, if you put in "100", it will run for 60 seconds.

There are 20 people in an empty, square room. Each person has full sight of the entire room and everyone in it. If you are not allowed to move in any way (other than your eyes). Where can you place an apple so that all but one person can see it?

Chapter 7 by Riri

On top of the seer's head! Get it, cause you would be the only person not to see it while everyone else could ;)

Next question...

Three men walk into a hotel and rent a room for 30 dollars but the hotel manager realized the room should have been only 25 dollars. So he sent the dishonest bellboy and told him to give 5 dollars back to the men. The bellboy cheated and said to the three men the room was actually 27 dollars and gave them 3 dollars back and donated the other to his favorite charity. Where is the missing dollar because $25 + 4 = 29$?

Chapter 8 by Purple Bookworm

A Japanese ship was sailing on an ocean. The Japanese captain of the ship put his diamond chain on a shelf, went to get a snack before lunch and returned ten minutes later. When he returned, the chain was missing! He called the crew of his ship together. There were three of them. A British guy was the cook of the ship. The captain asked him: "Where were you the last ten minutes?" And the cook answered "I was in the cold storage room to select the meat for lunch". An Indian guy was the engineer maintaining the ship. Same question, and the Indian told that he was in the generator room checking the generator. A French guy also served on the house keeping crew. Same question, and the French told that he was sleeping after the night shift. Within ten seconds the smart captain caught the thief. Who was the thief?
